Want to setup your Macbook on our Wireless Network?

The DER Wireless network only supports the WiFi-n standard devices. Some older Macs do not have this functionality. If your Mac does not have this then you will not be able to use the nswdet DER network.

1. Click the Airport / WiFi icon in the menu bar
2. Click on “detnsw”
3. Enter your DEC username followed by ”@detnsw”
   eg. firstname.lastname@detnsw
4. Enter your DEC password
5. Click OK
6. The popup will ask you to Verify a certificate - click Continue
7. Enter the password you use to log in to the Macbook PC
8. Click OK
9. You will now need to configure the Proxy
10. Open “System Preferences” (Apple Menu > System Preferences)
11. Click “Network”
12. Click “WiFi”
13. Click “Advanced”
14. Click the “Proxies” tab
15. Select “Configure Proxies” > tick “Automatic Proxy Configuration”
16. Enter the following
17. Press “OK/”Apply” then quit System Preferences

Your Mac should now be connected to the DEC Wireless with access to the internet. Some applications may not use the system proxy, for these applications you will need to find their proxy settings and enter “proxy.det.nsw.edu.au” and port “8080”. You will also need to enter your DEC username and password.
