BYOD Recommendations for Parents

Year 7 and Year 8 only require access to an entry level device. Provision of an entry level device encourages the use of a device as a tool not as a gaming machine which may create a distraction from learning for some students.

Year 9 and 10 require a higher performance device and students that study Computing subjects should be encouraged to buy Windows based Laptops.

The school does not recommend or supports the use of Ipad or tablets.

It is strongly advised that BYOD devices have the following specifications:

- At least 6 hours of battery life
- At least 4GB RAM
- At least 120GB SSD hard drive
- Less than 1.6 kg weight
- Wi-Fi compatible with 802.3 n/ac

No brand or model is mandated by the school and any device. The following devices as offered as examples of devices which meet the specifications and are most easily supported by our IT team.

**Entry level devices:**
- Acer TravelMate B117-M NX.VCGEK.008
- Dell Inspiron 11 3000
- Mac Book Air

**High performance devices:**
- Lenovo Ideapad 710S
- Mac Book Pro
- TravelMate P249-M UN.VD4SA.122
